- E. should be made available for others' use
- F. should be repaired rather than thrown away
- G. should be further modified to be made less harmful
- H. should be retained and used for different purposes

	Type of Waste	Advice
25	Paint	
26	Batteries	
27	Medicines	
28	Pesticides	
29	Tyres	
30	Fridge	

PART 4

Questions 31–40

Complete the notes. Write **ONE WORD ONLY** for each answer.

Whale Shark Conservation Field Trip

Background

- Whale sharks are the world's biggest fish.
- Comparison with whales:
 - Similarities: They're large and they feed on plankton and krill.
 - Differences: They stay near the **31** _____ and they lack any actual **32** _____
- A large number head to the waters off Ningaloo, Western Australia, each year.
- The coral reef, where the whale sharks feed, is unusually close to the **33** _____

Research Centre Activities

- Existing methods of monitoring whale sharks are imperfect:
 - tracking devices attached to the whale shark's **34** _____ (expensive and unreliable)
 - from a **35** _____ (imprecise)
- New research project on whale shark feeding habits:
 - Analysis of plankton shows different amounts of **36** _____ varieties.
 - Researchers are comparing plankton data using special maps.
- Study on the impact of humans on whale shark behaviour: noise caused whale sharks to **37** _____
- Community outreach programme — The whale shark race:
 - A mature whale shark is tagged and assigned to a **38** _____ to follow.
 - Results are displayed on the research centre website.

Conservation and Management

- Record any **39** _____ to whale sharks in photo-identification libraries.
- Ban scuba activities as whale sharks are affected by the **40** _____ the activities produce.
